

Feng Shou Chang (Kenzo)

Software Engineer

Software Development • Automation • System Integration

Email: KCRich566@gmail.com

Phone: +886 932 271 737

Personal Information

Gender	Male	Nationality	Taiwan
Age	35 years old	Residence	Taiwan
Marital Status	Single	Education	M.S. Electronic Engineering
Relocation	Willing to Relocate		

Professional Summary

Senior Software Engineer with 10+ years of experience in software development, automation, system integration, and production software deployment.

Experienced in developing enterprise applications, automation frameworks, manufacturing software platforms, and validation infrastructure using C# and Python.

Contributed to Microsoft's MAIA AI Accelerator firmware validation program by developing automation and validation frameworks.

Led software development and deployment projects for FutureDial customers across the United States, Japan, and Germany.

Professional Highlights

- Developed SMARTGrade from concept to production release, supporting 34+ production and demonstration systems.
- Designed configurable grading-rule workflows supporting customer-specific business requirements.
- Developed smartphone identification models supporting approximately 120 device models with around 99% classification accuracy.
- Built automation frameworks supporting Microsoft's MAIA AI Accelerator firmware validation program.
- Designed reusable PowerShell-Python integration libraries reducing duplicated automation development effort.
- Relocated to the United States to support software development, deployment, and customer customization activities.

Skills

Programming: C#, Python, C++ (MFC), PowerShell

Software Development: WinForms, WPF, FastAPI, REST API, Object-Oriented Programming, Software Design

Automation & Testing: Automation Framework Development, Pytest, Robot Framework, Selenium, Validation Testing

Development Tools: Git, SVN, Azure DevOps, Docker, Redmine, Mantis

System Integration: Machine Integration, Socket Programming, XML Processing, AWS S3

Computer Vision: OpenCV, HALCON, Image Processing, OCR

Professional Experience

Engineer (Embedded & Firmware)

Lenovo | 2026-07-06 – Present | Taipei, Taiwan

Continued firmware engineering activities after Lenovo's acquisition of Phoenix Technologies.

Software Designer (Microsoft MAIA NCP Firmware Validation Team)

Phoenix Technologies | 2025-05-05 – 2026-07-05 | Taipei, Taiwan

- Developed Python-based automation and validation frameworks supporting Microsoft's MAIA AI Accelerator program.
- Developed validation workflows to improve firmware testing efficiency and regression verification.
- Implemented reusable PowerShell-Python integration libraries for automation reuse.
- Performed firmware root-cause investigation through log analysis, telemetry review, and regression analysis.
- Collaborated with Microsoft firmware engineers on validation coverage and release qualification.

Software Engineer

FutureDial Inc. | 2018-09-20 – 2025-04-30 | San Jose, CA, USA (H1B) / Taipei, Taiwan

- Led SMARTGrade software development from MVP to production release.
- Designed and implemented software architecture for SMARTGrade, including C# application modules, grading-rule engines, customer APIs, and machine integration workflows.
- Developed AWS-connected reporting and traceability solutions.
- Supported customer deployment projects across the United States, Japan, and Germany.
- Relocated to the United States to support customer-facing development and deployment activities.
- Mentored junior engineers and participated in architecture discussions and code reviews.

Computer Vision Engineer

Xintec Inc. | 2017-10-31 – 2018-06-15 | Taoyuan, Taiwan

- Developed automation software and vision applications for wafer manufacturing operations.
- Participated in CNN-based wafer inspection system development.
- Supported production troubleshooting and root-cause analysis activities.

AOI Software Engineer

Jettech Technology | 2015-09-16 – 2017-09-26 | New Taipei, Taiwan

- Developed AOI software, image-processing applications, and production-machine integrations.
- Integrated PLC systems, machine controls, and camera SDKs.
- Supported customer deployment and acceptance activities.

| Education

M.S. Electronic Engineering – National Kaohsiung University of Science and Technology (formerly National Kaohsiung University of Applied Sciences) (2015)

Thesis: Pedestrian Occlusion Detection Using OpenCL Framework

Publication in TANET 2014: AN EFFICIENT COLOR INTERPOLATION METHOD FOR DIGITAL CAMERA

B.S. Electronic Engineering – National Kaohsiung University of Science and Technology (formerly National Kaohsiung University of Applied Sciences) (2013)
